- LIGHT WEIGHT, BERRY AMENDMENT COMPLIANT, LEVEL IIIA 9MM BALLISTIC SOFT ARMOR
- PROVIDES PROTECTION FROM FRAGMENTATION & SECONDARY BLAST PROJECTILES
- SYSTEMS AVAILABLE FOR ALL PASGT, MICH, ACH & ECH KEVLAR STYLE HELMETS

HELMET MOUNTED BALLISTIC PROTECTION SYSTEMS

The Helmet Mounted Ballistic Facial Protection Systems were developed to protect Combat Gunners and other Mounted Warriors from fragmentation or other secondary blast projectiles caused by IEDs. The Helmet Mounted Ballistic Facial Protection system covers the entire face to deliver MIL-V-43511C & ANZI Z87.1+ impact protection. The Level IIIA 9mm Soft Armor Ballistic Pad, which is Berry Amendment Compliant, provides additional ballistic protection by covering the lower mandible of the user's face. Each system utilizes a "Quick Lens Change System" that allows operators to quickly remove, replace, or switch lenses for different lighting conditions. Systems are available for PASGT, MICH, and ACH Kevlar helmets.
